Hello, my name is Duncan Connor, and I am here to recommend the Percy Jackson series to you. Percy Jackson is a series of young adult books written by Rick Riordan. They are about a twelve year old boy who discovers that he is the child of a Greek god, and the adventures he has because of this.

The Percy Jackson series is five books, with some sequel series after that. The first book in it is *The Lightning Thief*. I would recommend starting here, as the series follows a chronological order. In this book, Percy ends up chased to Camp Half Blood, a place for demigods like himself. He then goes on a quest across the country to save his mother from the Underworld.

One of the reasons I recommend the Percy Jackson series is that the books are incredibly well written. The dialogue and narration are witty and clever, and the references to Greek mythology are worked in fantastically. The story told is also captivating, with likeable characters in interesting settings, going on an adventure. The genre of urban fantasy is one that is rarely delved into, but I believe that Percy Jackson is an excellent example of it.

I would recommend Percy Jackson to all ages, it can be enjoyed by both kids and adults. It is similar to the popular Harry Potter franchise in premise, but tells a more adventurous story, with a greater emphasis on characters. I found them to be good books when I read them, and I think that you will too.
